Abstract

This report presents Zanzibar's Quarterly Gross Domestic Product (GDP) estimates for the second quarter of 2026, compiled using the newly rebased National Accounts series with 2019 as the base year, replacing the previous 2015 base year. The rebasing exercise was undertaken to ensure that the National Accounts reflect the current structure of Zanzibar's economy, incorporate updated benchmark information and data sources, and improve the accuracy, reliability, and relevance of macroeconomic statistics in line with international standards and best practices.

The rebased National Accounts incorporate benchmark data from the 2019 Supply and Use Table (SUT), adopt the recommendations of the 2008 System of National Accounts (SNA 2008), and align industry classifications with the International Standard Industrial Classification of All Economic Activities (ISIC Rev. 4). These methodological improvements provide a more comprehensive and accurate representation of economic activity and strengthen the international comparability of Zanzibar's GDP estimates. Furthermore, the quarterly GDP series has been benchmarked to the revised annual GDP levels resulting from the rebasing exercise, ensuring consistency between annual and quarterly estimates.

The introduction of the rebased GDP estimates marks an important milestone in the compilation and dissemination of Zanzibar's National Accounts statistics. As a result of the methodological enhancements and revisions to source data, the estimates presented in this report may not be directly comparable with those previously published under the former 2015 base year series.

During the second quarter of 2026, real GDP at constant 2019 prices was estimated at TZS 1,875 billion, representing a year-on-year incline of 6.9 percent. At current prices, nominal GDP increased by 8.9 percent compared with the corresponding quarter of 2025. The report provides an overview of economic developments during the quarter, highlighting GDP growth trends and the performance of major economic sectors.

The findings presented in this report provide policymakers, planners, investors, researchers, development partners, and other stakeholders with timely and reliable information on the state of Zanzibar's economy. The report establishes a new statistical benchmark for monitoring short-term economic performance and supports evidence-based planning, policy formulation, and the assessment of progress towards Zanzibar's development objectives.

Overview

Zanzibar's Gross Domestic Product (GDP) in the second quarter of 2026 in volume terms increased by 6.9 percent compared with 6.7 percent recorded in the corresponding quarter of 2025. The analysis of GDP growth by economic activity shows that Accommodation and Food Services were the main contributors to overall GDP growth during the quarter, contributing 1.3 percentage points. This was followed by Construction, which contributed 1.0 percentage points, Public Administration contributed 0.7 percentage points, while Financial and Insurance Activities contributed 0.6 percentage points.

Other notable contributions came from Taxes on Products, Crops, Transport and Storage, and Real Estate Activities, each contributing 0.5 percentage points. Manufacturing, Wholesale and Retail Trade, and Fishing each contributed 0.3 percentage points. Education, Mining and Quarrying, Livestock, Administrative and Support Services, and Human Health and Social Work each contributed 0.1 percentage points.

Relatively small contributions were recorded in Other Services (0.04 percentage point), Electricity Supply, Information and Communication, and Forestry, each contributing 0.03 percentage point, while Water Supply contributed 0.02 percentage point. Arts, Entertainment and Recreation contributed 0.005 percentage points, Households as Employers contributed 0.004 percentage points, and Professional, Scientific and Technical Activities contributed 0.002 percentage points (Figure 1).

Overall, the results indicate that GDP growth during the second quarter of 2026 was largely supported by service-related activities, with Accommodation and Food Services, Construction, Public Administration, and Financial and Insurance Activities making relatively large contributions to the overall growth.

Analysis of GDP Broad Sector at Current and Constant Price

GDP at Current Price Broad Sector

For analytical purposes, Zanzibar's Gross Domestic Product (GDP) is classified into four broad sectors: the Primary Sector (Agriculture), the Secondary Sector (Industry), the Tertiary Sector (Services), and Taxes on products.

Figure 2: Share of Main Sector at Current Price in (%), Q2 2026

Figure 2 shows the composition of GDP at current prices for the year 2026, categorized into four main broad sectors of the economy, Primary Sector (Agriculture sector), Secondary Sector (Industry Sector) and Tertiary Sector (Services Sector) and Taxes on products.

The services sector remained the largest contributor to the economy, accounting for 51.2 percent of total GDP. This indicates that the economy continues to be predominantly driven by service-related activities, highlighting the sector's significant role in overall economic performance. The Agriculture, Forestry and Fishing sector accounted for 21.3 percent of total GDP, making it the second-largest contributor and underscoring the continued importance of primary activities to the economy. The industrial sector contributed 18.8 percent, reflecting its important, though comparatively smaller, role in economic output. Meanwhile, taxes accounted for 8.7 percent of total GDP, representing the smallest share among the four components. Overall, the results indicate that the economy is largely service-oriented, while agriculture remains a key productive sector and industrial activities continue to make a notable contribution to GDP.

Table 2: Share of Main Sector of GDP at Current Price, 2021-2026

Years	Quarters	Agriculture, Forestry and Fishing	Industrial	Services	Taxes
2023	Q1	17.0	18.0	58.5	6.5

2026	Q1	22.5	18.1	53.8	5.6
	Q2	21.3	18.8	51.2	8.7

Growth of Main Sectors at Constant Prices

Agricultural sector increased by 6.3 percent due to an increase in yields of crops such as paddies, cassava, banana, vegetables and fruits like watermelons and tomatoes, as well as an increase in fishery production.

The Industrial sector also increased by 6.8 percent. This growth was primarily due to increases in mining and quarrying production and Construction Activities.

The Service sector grew by 7.5 percent compared with corresponding quarter, 2025. This growth came from crucial sectors including Accommodation and Food Services, Arts, Entertainment & Recreation, Public Administration, Real Estate, Education, Wholesale and retail trade, Financial and Insurance Activities as well as Human Health & Social work.

Table 3: Summary of growth rate (%) of main economic sectors, Q1_2025 – Q2_2026

Sectors	2025				2026	
	Q1	Q2	Q3	Q4	Q1	Q2
Agriculture, Forestry and Fishing	7.4	8.9	6.9	1.4	6.2	6.3
Industrial	6.3	7.1	3.6	12.7	6.4	6.8
Service	4.5	5.5	4.8	13.3	7.3	7.5

Figure 3: Changes in percentage by economic activity Q2 2026 to the corresponding quarter 2025

The results show that based on constant price, the GDP growth by economic activity indicates mixed performance across industries during this quarter. The highest growth rates were recorded in Accommodation and Food Service Activities (12.3 percent), reflecting an increase in tourist arrivals followed by Arts, Entertainment and Recreation (10.5 percent). Mining and Quarrying also grew by 9.0 percent. Strong growth was further observed in Construction Activities (8.4 percent), Public Administration (8.0 percent), Fishing (7.8 percent), Real Estate (7.3 percent), Education (6.9 percent), Crops (6.8 percent), Wholesale and Retail trade (6.6 percent), Financial and Insurance (6.5 percent), Human Health (6.4 percent), Other Service (6.0 percent), Transport and Storage (5.8 percent) and Taxes on Product (5.1 percent).

On the other hand, relatively lower growth rates were recorded in Professional, Scientific and Technical Activities (1.9 percent), Administrative and Support Service Activities (2.2 percent) and Forestry (2.9 percent).

Performance by Main Sectors

The Agriculture, Forestry and Fishing

In this quarter, the sector increased by 6.3 percent compared to corresponding quarter of 2025. This is due to the increase in Fishing by 7.8 percent, Crops Production 6.8 percent, Livestock increase by 4.1 percent and Forestry 2.9 percent.

At current prices, Agriculture, Forestry & Fishing sector was valued at TZS 491 billion in Q2 2026, accounting for about 21.3 percent to the total GVA.

TOTAL	456,038	491,321	21.3	244,895	260,356	6.3

The Industrial Sector

At constant prices Industrial sector increased by 6.8 percent in Q2 2026 compared to corresponding quarter of 2025. This was mainly attributed to the increase in Mining and Quarrying 9.0 percent, followed by Construction 8.4 percent, Manufacturing 4.4 percent, Water Supply 4.0 percent and Electricity Supply 3.9 percent.

At current prices, this sector was valued at TZS 433 billion, contributing 18.8 percent to the total GVA.

The Services Sector

At constant prices, the services sector has increased by 7.5 percent compared to corresponding quarter of 2025. The positive growth was attributed to Accommodation and Food Services (12.3 percent) followed by Arts, Entertainment and Recreation (10.5 percent), Public Administration (8.0 percent), Real Estate (7.3 percent), Education (6.9 percent), Wholesale and Retail Trade (6.6 percent), Financial and Insurance (6.5 percent), and Human Health & Social Work (6.4 percent), among others.

At current prices, the services sector was valued at TZS 1,182 billion and contributed 51.2 percent to the total GVA in Q2 2026.

Introduction

The compilation of national accounts statistics is a dynamic process and therefore needs to adapt to reflect a variety of measures and indicators consistent with developments and structural changes in the economy over a period. It is therefore expected that revisions and updates are made to the historical series on a quarterly or annual basis as new data sources are brought into the model and as various benchmarks and assumptions are validated and updated.

*This quarterly report is the 2nd published by the Office of the Chief Government Statistician of the quarterly new series of GDP estimates at constant **2019** prices. This report is an ongoing publication and can also be downloaded from our website www.ocgs.go.tz.*
