GROSS DOMESTIC PRODUCT BY PRODUCTION

NOMINAL GROSS DOMESTIC PRODUCT

Table 1: Nominal GDP 2019 - 2024 (in Billion TZS)

Year	2024	2023	2022	2021	2020	2019
Taxes on products	571.7	469.0	454.3	414.1	413.2	414.4
Total GVA at basic price	6,000.9	5,572.3	4,946.0	4,366.1	3,795.6	3,721.3

Table 1 presents the nominal Gross Domestic Product (GDP) at market prices and the total Gross Value Added (GVA) at basic prices for the period 2019 to 2024. In 2024, the nominal GDP at market prices is estimated at TZS 6,572.6 billion, representing a growth rate of 8.8 percent. Taxes less subsidies are recorded at TZS 571.7 billion in 2024, an increase of TZS 102.7 billion or 21.9 percent compared to the previous year.

Figure 1: Nominal GDP per capita 2019 -2024 (in USD)

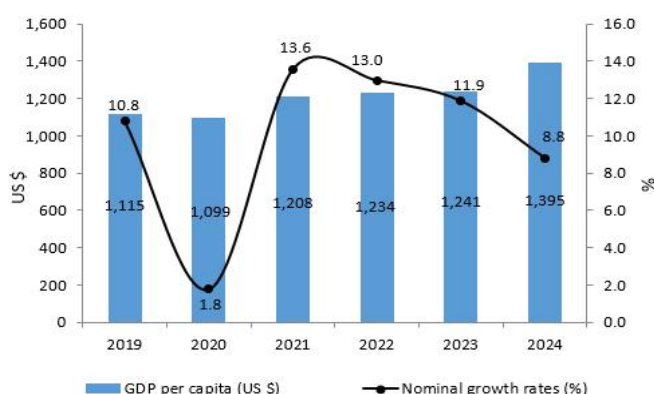

Figure 1 illustrates the trend of nominal GDP per capita from 2019 to 2024. In 2024, GDP per capita is estimated at US\$ 1,395, reflecting an increase of 12.4 percent compared to the previous year. Over the past five years, the average annual growth rate of GDP per capita has been 4.7 percent. Figure 2 shows the Nominal GDP percentage for the year 2024.

Accommodation is the first largest industry with a percentage share of 16.9 percent. Livestock the second largest industry with a percentage share of 10.5 percent. Construction industry with a percentage share of 10.0 percent was the third largest industry. Arts, entertainment and recreation, Professional scientific and technical and Domestic services industries shares were the the lowest percentage in the Nominal GDP, with a share of 0.1 percent respectively. Administrative and support services and Water supply and sewerage industries have the second lowest share of 0.5 percent respectively for year 2024.

Figure 2: Percentage share of Nominal GDP 2024

REAL GROSS DOMESTIC PRODUCT

Table 2: Real GDP 2019 - 2024 (in billion TZS)

Year	2024	2023	2022	2021	2020	2019
GDP at Market Price	4,026.40	3,758.60	3,498.80	3,275.30	3,116.30	3,077.50
Taxes less subsidiess	345.3	322.7	304.8	295.8	296	291.3
Total GVA at basic price	3,681.10	3,436.00	3,194.10	2,979.50	2,820.30	2,786.20

Table 2 presents the real Gross Domestic Product (GDP) at market prices and total Gross Value Added (GVA) at basic prices for the period 2019 to 2024. In 2024, real GDP at market prices is estimated at TZS 4,026.4 billion, an increase of TZS 267.8 billion compared to the previous year, corresponding to a 7.1 percent annual growth rate. Taxes less subsidies amount to TZS 345.3 billion in 2024, reflecting an increase of TZS 23 billion or 7.0 percent compared to the preceding year.

Figure 3: Real GDP and growth rate, 2019-2024

Figure 3 illustrates the trend of real GDP (in TZS) and its corresponding growth rates. As shown in the figure, Zanzibar's economy recorded positive real GDP growth throughout the period, except in 2020, when growth slowed to 1.3 percent due to the adverse effects of the COVID-19 pandemic. In 2024, the economy expanded by 7.1 percent, driven primarily by strong performance in the tourism and transportation sectors.

IMPLICIT PRICE DEFLATOR

Figure 4: Implicit price deflator and growth rate, 2019 - 2024

Figure 4 presents the Implicit Price Deflator (IPD) and its corresponding growth rate. In 2024, the IPD is estimated at 163.2, reflecting a 1.6 percent increase compared to the previous year, indicating a rise in the overall price level of the economy. In contrast, the overall price level declined in 2020, largely due to a decrease in prices within the tourism sector.

Crops

In 2024, the real Gross Value Added (GVA) for the Crops sector is estimated at TZS 306.2 billion, representing an increase of 6.4 percent compared to 2023. The sector's contribution to total GVA stands at 6.8 percent. This growth reflects improvements in agricultural productivity and higher output across key crops such as cassava, sweet potatoes, and bananas. The expansion is attributed to favorable weather conditions, enhanced access to agricultural inputs, and the adoption of improved farming practices that boosted yields and efficiency.

Figure 5: Value Added and growth rate for Crops Activities 2019 – 2024

The figure 5 above illustrates the Crops sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024, showing a generally upward trend consistent with the sector's ongoing recovery and modernization efforts.

Livestock

Figure 6: Livestock and growth rate 2019 – 2024

The Real Gross Value Added (GVA) for the Livestock sector is estimated at TZS 167.1 billion in 2024, representing a contraction of 10.8 percent compared to the previous year. This decline primarily reflects a reduction in the number of animals slaughtered, indicating lower production activity within the sector. Consequently, the Livestock sector accounted for 10.5 percent of the total Real GVA, underscoring its continued but slightly weakened contribution to the overall agricultural output.

Figure 6 illustrates the Livestock sector's value added, measured in billion TZS, alongside its annual real growth rate over the period 2019 to 2024. The figure highlights the fluctuations in sector performance, reflecting changes in production levels and market dynamics during the period under review.

Forestry

In 2024, the real Gross Value Added (GVA) for the Forestry sector is estimated at TZS 50.0 billion, reflecting a marginal increase of 0.1 percent compared to 2023. The sector's contribution to total GVA stands at 1.2 percent. This modest growth is mainly attributed to a slight rise in the production volume of forestry products, supported by improved forest management practices and increased demand for timber and related products. Figure 7 illustrates the Forestry sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024, showing a generally stable trend with minor fluctuations driven by variations in production and resource utilization.

Figure 7: Value Added and growth rate for Forestry 2019 – 2024

Fishing

Figure 8: Value and Growth rate for Fishing Activities 2019 – 2024

The Real Gross Value Added (GVA) for the Fishing sector is estimated at TZS 198.0 billion in 2024, as shown in Figure 8. This represents a growth of 14.2 percent compared to 2023, indicating a notable expansion in fishing activities. The increase is largely attributed to a higher volume of fish catch relative to the previous year, reflecting improved sector performance. Overall, the Fishing sector contributed 5.7 percent to total Real GVA in 2024, underscoring its continued importance within the primary production industries.

Mining and Quarrying

In 2024, the real Gross Value Added (GVA) for the Mining and Quarrying sector is estimated at TZS 51.5 billion, representing a strong growth of 17.0 percent compared to 2023. The sector accounts for 0.8 percent of total GVA. This notable performance is mainly attributed to the expansion of quarrying activities, including increased extraction of natural resources such as sand, gravel, and sawdust during the year. The sector's growth also reflects rising demand for construction materials linked to infrastructure development projects.

Figure 9: Value Added and growth rate for Mining and Quarrying Activities 2019 – 2024

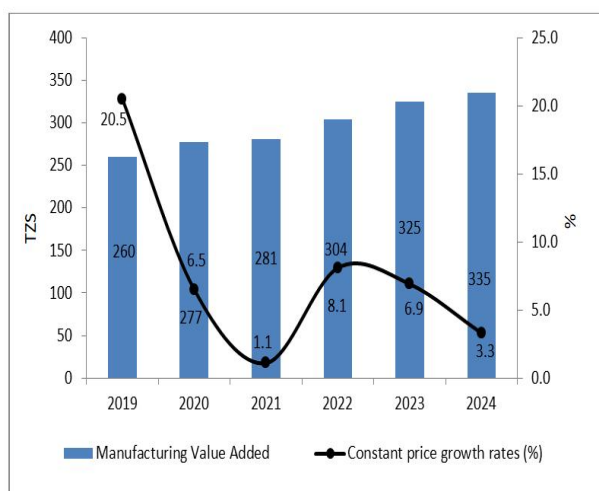

Figure 9 illustrates the Mining and Quarrying sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024, showing a generally upward trend supported by increased production and investment in extractive activities.

Manufacturing

Figure 10: Value Added and growth rate for Manufacturing Activities 2019 – 2024

In 2024, the real Gross Value Added (GVA) for the Manufacturing sector is estimated at TZS 335.4 billion, reflecting a growth of 3.3 percent compared to 2023. The sector's contribution to total GVA stands at 7.8 percent. The growth is mainly driven by increased production in food processing, beverages, and construction-related materials, supported by improvements in energy supply, access to raw materials, and the expansion of small and medium-scale manufacturing enterprises. Figure 10 illustrates the Manufacturing sector's value added in billion TZS and its annual growth rate from 2019 to 2024, highlighting steady growth over the period, with notable resilience despite global and domestic economic challenges.

Electricity and Gas

In 2024, the real Gross Value Added (GVA) for the Electricity and Gas sector is estimated at TZS 19.2 billion, representing a growth of 11.2 percent compared to 2023. The sector's contribution to total GVA stands at 1.0 percent. This notable increase was mainly driven by rising electricity consumption across various user categories, including households, commercial establishments, and industrial enterprises. The growth also reflects continued investment in energy infrastructure, expansion of the national grid, and increased adoption of renewable energy sources.

Figure 11 illustrates the Electricity and Gas sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024, showing consistent upward growth supported by expanding access and improved reliability of power supply.

Figure 11: Value Added and growth rate for Electricity and Gas Activities 2019 – 2024

Water supply and Sewerage

Figure 12: Value Added and growth rate for Water Supply and Sewerage Activities

2019 – 2024

The real Gross Value Added (GVA) for the Water Supply and Sewerage sector is estimated at TZS 33.9 billion for 2024, reflecting an increase of 6.3 percent compared to 2023. The sector's contribution to total GVA stands at 0.5 percent. The growth is primarily driven by expanded access to clean water, improvements in water distribution infrastructure, and enhanced efficiency in sewerage management services. Figure 12 illustrates the Water Supply and Sewerage sector's value added in billion TZS and its annual growth rate from 2019 to 2024, highlighting steady progress in service delivery and infrastructure development over the period.

Construction

The real Gross Value Added (GVA) for the Construction sector is estimated at TZS 307.7 billion in 2024, reflecting a growth of 6.3 percent compared to 2023. The sector's share of total GVA stands at 10.0 percent. This growth was primarily driven by increased demand for new buildings and infrastructure projects, which significantly contributed to overall GDP expansion. Investments in both public and private construction activities, including residential, commercial, and civil works, underpinned this performance.

Figure 13: Value Added and growth rate for Construction Activities 2019 – 2024

Figure 13 illustrates the Construction sector's value added in billion TZS and its annual growth rate from 2019 to 2024, showing a consistent upward trend aligned with rising infrastructure development and urbanization.

Wholesale and Retail Trade

The Real Gross Value Added (GVA) for the Wholesale and Retail Trade sector is estimated at TZS 347.4 billion in 2024, reflecting an increase of 11.6 percent compared to the previous year. This growth signifies a continued recovery from the adverse effects of the COVID-19 pandemic, which had previously constrained trade activities due to border closures and disruptions in the transportation of goods. The sector's improved performance highlights the restoration of market

activity and consumer demand. In 2024, the Wholesale and Retail Trade sector accounted for 6.1 percent of total Real GVA, emphasizing its vital role in supporting Zanzibar’s economic recovery and commercial dynamism.

Figure 14: Value Added and growth rate for Wholesale and retail trade Activities 2019 – 2024

Figure 14 illustrates the value added of the Wholesale and Retail Trade sector, measured in billion TZS, together with its annual real growth rate for the period 2019 to 2024. The figure highlights the sector’s gradual recovery following the COVID-19 pandemic and the subsequent rebound in trade activities driven by the reopening of borders and the normalization of goods movement.

Transport and Storage

The Real Gross Value Added (GVA) for the Transportation and Storage sector is estimated at TZS 147.6 billion in 2024, recording no significant change compared to the previous year. The sector experienced substantial disruption during the COVID-19 pandemic, as mobility restrictions and reduced travel demand severely constrained transport activities. Consequently, in 2020 the sector contracted by 6.6 percent. Although it has since stabilized, the pace of recovery remains modest, reflecting the lingering effects of the pandemic on transportation services and logistics operations.

Figure 15 presents the Transport and Storage sector’s value added, measured in billion TZS, alongside its annual real growth rate over the period 2019 to 2024. The figure illustrates the sector’s performance trends, including the significant downturn in 2020 due to COVID-19 mobility restrictions and its subsequent gradual stabilization in the post-pandemic period.

Figure 15: Value Added and growth rate for Transport & Storage Activities 2019 – 2024

Accommodation and Food Services

The Real Gross Value Added (GVA) for the Accommodation and Food Services sector is estimated at TZS 749.3 billion in 2024, representing an annual growth of 13.7 percent compared to the previous year. The sector experienced its lowest value in 2020, largely due to the severe impact of the COVID-19 pandemic, which disrupted global travel and tourism activities. Since then, the sector has shown a strong recovery, driven by increased investment in tourism infrastructure and services, as well as the resurgence of international visitor arrivals. This rebound underscores the sector’s pivotal role in supporting Zanzibar’s economic growth and employment creation.

Figure 16: Value Added and growth rate for Accommodation & Food Services Activities, 2019 – 2024

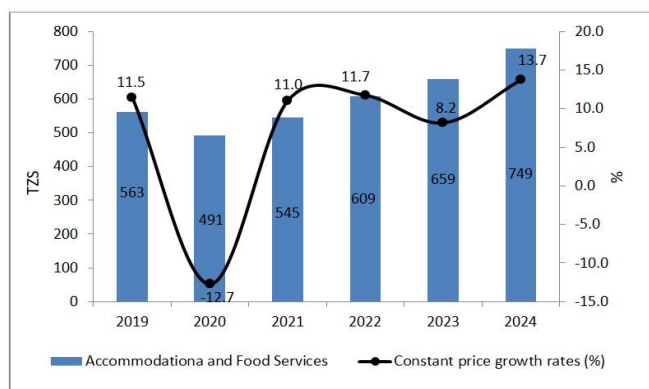

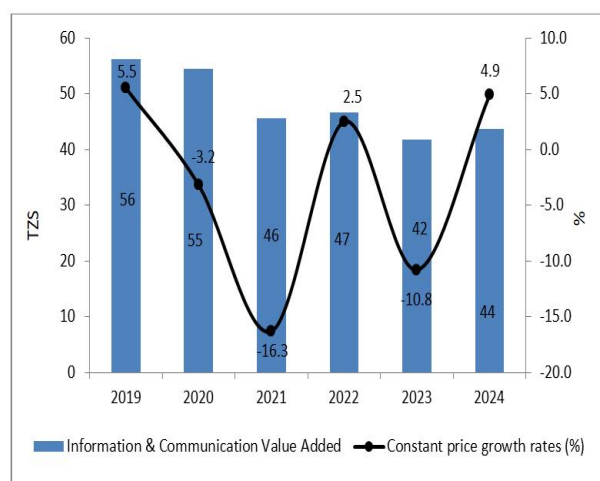

Figure 16 illustrates the Accommodation and Food Services sector's value added, measured in billion TZS, together with its annual real growth rate for the period 2019 to 2024. The figure highlights the sharp decline in 2020 resulting from the COVID-19 pandemic, followed by a strong recovery driven by renewed tourism activities and increased investment in the sector.

Information and Communication

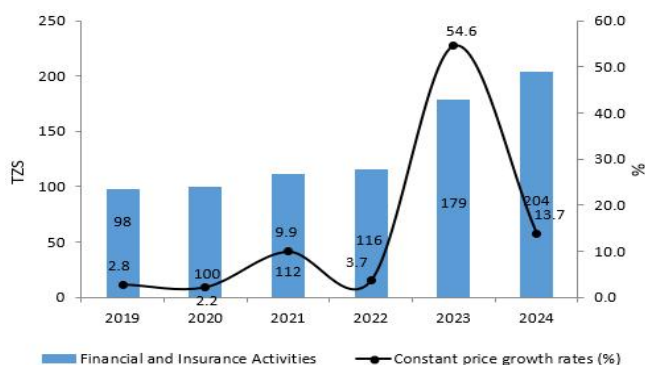

In 2024, the real Gross Value Added (GVA) for the Information and Communication sector is estimated at TZS 43.7 billion, representing a growth of 4.9 percent compared to 2023. The sector's contribution to total GVA stands at 0.7 percent. This growth is largely driven by increased sales of airtime and telecommunications services, as well as the sector's role in enhancing efficiency and productivity across other economic sectors through improved information and communication technologies. Figure 16 illustrates the Information and Communication sector's value added in billion TZS and its annual growth rate from 2019 to 2024, highlighting steady growth supported by technological adoption and expanding digital services.

Figure 16: Value Added and growth rate for information and Communication Activities 2019 – 2024

Financial and Insurance Activities

Figure 17: Value Added and growth rate for Financial and Insurance Activities, 2019 – 2024

The Real Gross Value Added (GVA) for the Financial and Insurance Activities sector is estimated at TZS 203.6 billion in 2024, reflecting a growth of 13.7 percent compared to 2023. This expansion indicates a continued strengthening of financial services, driven by the increased uptake of both banking and insurance products during the year. The sector's performance highlights the growing role of financial intermediation and risk management in supporting economic activity.

In 2024, the Financial and Insurance Activities sector accounted for 5.7 percent of total Real GVA, underscoring its significance in enhancing financial inclusion and economic resilience.

Figure 17 illustrates the value added of the Financial and Insurance Activities sector, measured in billion TZS, along with its annual real growth rate over the period 2019 to 2024. The figure highlights the sector's steady expansion, reflecting increased banking and insurance activities and its growing contribution to Zanzibar's overall economic performance.

Real Estate Activities

In 2024, the real Gross Value Added (GVA) for the Real Estate Activities sector is estimated at TZS 231.2 billion, reflecting a growth of 7.3 percent compared to 2023. The sector's share of total GVA stands at 7.2 percent. This performance was driven by sustained demand across the residential, commercial office, and industrial property segments, supported by continued investment and development activity in the real estate market.

Figure 18: Value Added and growth rate for Real Estate Activities 2019 – 2024

Figure 18 illustrates the Real Estate Activities sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024. The figure highlights a steady upward trend in the sector, reflecting sustained demand and ongoing development in residential, commercial, and industrial property markets over the period.

Professional, Scientific and Technical

Figure 19: Value Added and growth rate for Information, Scientific and Technical Activities 2019 – 2024

In 2024, the real Gross Value Added (GVA) for the Professional, Scientific, and Technical Activities sector is estimated at TZS 4.6 billion, representing a growth of 6.6 percent compared to 2023. The sector's contribution to total GVA stands at 0.1 percent, reflecting its relatively small but steadily growing role in the economy.

Figure 14 illustrates the Professional, Scientific, and Technical Activities sector's value added in billion TZS and its annual growth rate from 2019 to 2024, showing a consistent upward trend driven by increasing demand for specialized services and technical expertise across various industries.

Administrative and Support Services

In 2024, the real Gross Value Added (GVA) for the Administrative and Support Services sector is estimated at TZS 29.0 billion, reflecting a growth of 5.9 percent compared to 2023. The sector's share of total GVA stands at 0.5 percent. This growth was primarily driven by increases in office administration, office support, and other business support services. Additionally, security services, as well as travel agency and tour operation activities, contributed to the overall expansion of the sector.

Figure 20: Value Added and growth rate for Information, Scientific and Technical Activities 2019 – 2024

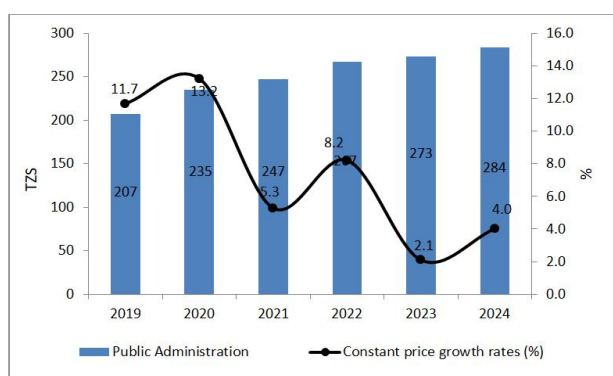

Figure 20 illustrates the Administrative and Support Services sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024. The figure highlights steady growth over the period, driven by rising demand for office administration, business support, security services, and travel-related activities.

Public Administration

Figure 21: Value Added and growth rate for Public administration Activities 2019 – 2024

The Real Gross Value Added (GVA) for the Public Administration sector is estimated at TZS 284.0 billion in 2024, recording an annual growth rate of 4.0 percent. This growth reflects a moderate increase in the value added by government activities. The sector's GVA is calculated based on the government's value added, adjusted using the government wage index, capturing the contribution of public administration to overall economic output.

Figure 21 presents the value added of the Public Administration sector, measured in billion TZS, alongside its annual real growth rate for the period 2019 to 2024. The figure highlights the sector's steady expansion, reflecting the consistent contribution of government activities to Zanzibar's overall economic output.

Education

In 2024, the real Gross Value Added (GVA) for the Education sector is estimated at TZS 112.4 billion, reflecting a growth of 7.0 percent compared to 2023. The sector's share of total GVA stands at 2.0 percent. Overall, the Education sector has demonstrated consistent positive performance over the long term, contributing steadily to human capital development and supporting broader economic growth.

Figure 22 illustrates the Education sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024. The figure highlights a consistent upward trend in the sector, reflecting sustained investment in educational services and ongoing improvements in access, quality, and overall performance over the period.

Figure 22: Value Added and growth rate for Education Activities 2019 – 2024

Human Health and Social Work

Figure 23: Value Added and growth rate for Human Health and Social Work Activities, 2019 – 2024

The Real Gross Value Added (GVA) for the Health and Social Work sector is estimated at TZS 46.4 billion in 2024, as shown in Figure 12. This represents a growth of 8.2 percent compared to 2023, largely driven by increased government expenditure on health services. The sector's contribution to the overall economy remains modest, accounting for 0.8 percent of total Real GVA, reflecting its role in supporting public health and social welfare.

Figure 24 illustrates the value added of the Human Health and Social Work sector, measured in billion TZS, alongside its annual real growth rate over the period 2019 to 2024. The figure highlights the sector's steady expansion, largely driven by increased government spending on health services and the provision of social welfare programs.

Arts, Entertainment and Recreation

In 2024, the real Gross Value Added (GVA) for the Arts, Entertainment, and Recreation sector is estimated at TZS 3.7 billion, reflecting a growth of 8.5 percent compared to 2023. The sector's contribution to total GVA stands at 0.1 percent. This growth is primarily driven by the expansion and increased operation of sports facilities, including various sports fields, alongside a rise in the number of sports competitions, events, and recreational services, particularly in areas frequented by tourists.

Figure 25: Value Added and growth rate for Arts, Entertainment and Recreation Activities 2019 – 2024

Figure 25 illustrates the Arts, Entertainment, and Recreation sector's value added in billion TZS and

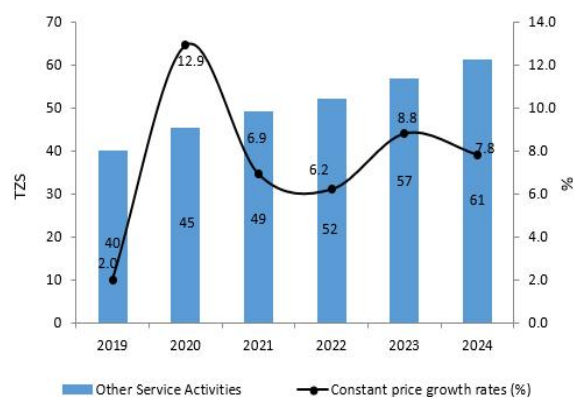

its corresponding annual growth rate from 2019 to 2024. The figure highlights the sector's steady expansion, driven by increased sports, recreational, and cultural activities, particularly in tourist areas.

Other Service Activities

In 2024, the real Gross Value Added (GVA) for the Other Service Activities sector is estimated at TZS 61.2 billion, reflecting a growth of 7.8 percent compared to 2023. The sector's share of total GVA stands at 1.4 percent. This growth was largely driven by the expansion of services related to the repair of computers and household goods, which contributed significantly to overall sector performance. Additionally, increased demand for personal wellness services and other personal service activities, along with the activities of membership organizations, played a key role in supporting the sector's overall growth.

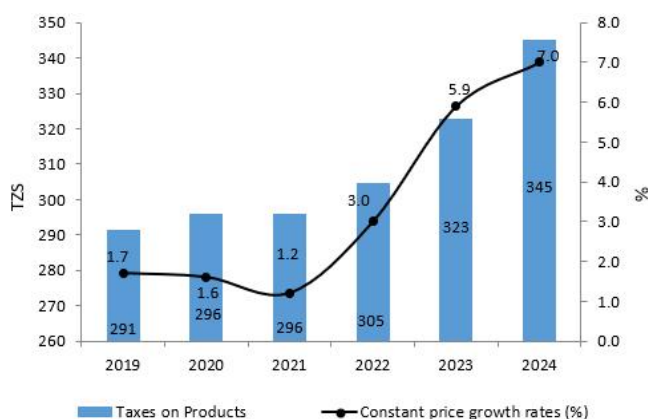

Figure 26 illustrates the Other Service Activities sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024. The figure highlights consistent growth over the period, driven by expansion in repair services, personal wellness and service activities, and the operations of membership organizations.

Figure 26: Value Added and growth rate for Other Service Activities 2019 – 2024

Tax on Products

Figure 18: Value Added and growth rate for Tax on Products 2019 – 2024

In 2024, the real Gross Value Added (GVA) for Taxes on Products is estimated at TZS 345.3 billion, reflecting a growth of 7.0 percent compared to 2023. The sector's contribution to total GVA stands at 8.7 percent, indicating its significant role in overall economic output.

Figure 18 illustrates the Taxes on Products sector's value added in billion TZS and its corresponding annual growth rate from 2019 to 2024. The figure highlights a steady upward trend, reflecting consistent growth in tax revenues and their contribution to overall economic output during the period.
