## Introduction

*The compilation of national accounts statistics is a dynamic process and therefore needs to adapt to reflect a variety of measures and indicators consistent with developments and structural changes in the economy over a period. It is therefore expected that revisions and updates are made to the historical series on a quarterly or annual basis as new data sources are brought into the model and as various benchmarks and assumptions are validated and updated.*

*This quarterly report is the 42<sup>nd</sup> published by the Office of the Chief Government Statistician of the quarterly series of GDP estimates at constant 2015 prices. This report is an ongoing publication and can also be downloaded from our website [www.ocgs.go.tz](http://www.ocgs.go.tz).*
