## P R E F A C E

The Statistical Abstract has been such an important source of information and presents data for users. Data from almost all sectors of the economy and social aspects are compiled and presented by OCGS. It is hoped that, it will enhance the use of statistics for planning and decision-making.

The Abstract presents brief information on the legislature, population, agriculture, industries, electricity and water, hotel and commerce, employment, Consumer Price Index and the general economy for the years 2007-2016.

We are most grateful and thankful to all who participated in making this publication another reality. We look forward to continue cooperating with them all.

It is our belief that no work of a human being is 'error free'. We therefore would like our esteemed users to forward constructive criticisms with a view towards improving future reports.

Office of the Chief Government Statistician welcomes comments from users not only on the quality of data published but also on the relevance and additional statistical series they would like to be included in order to strengthen the Zanzibar Statistical System. Any comment should be channeled to: E-mail [zanstat@ocgs.go.tz](mailto:zanstat@ocgs.go.tz).

**Mayasa M. Mwinyi**

## A. LAND AND CLIMATE

### A.1 Land and Economy

Zanzibar lies off the eastern coast of Africa in the Indian Ocean and is situated about 30 kilometers from the mainland of East Africa. It is a low-lying island of coral formation, with an area of about 2,534 sq km of which 1,533 square kilometers for Unguja and the remaining 1,000 square kilometers is for Pemba Island, with number of habitant t and unhabitan islets.

Cloves and seaweed are grown for export; fishing is also important to the local economy. Recently tourism has emerged to be the main source of revenues for the Revolutionary Government of Zanzibar (RGZ). The island's main port is located Zanzibar stone town situated on the western coast. It has a fine landlocked harbor with docking facilities for both passengers and cargo ships. The main airport is Abeid Aman Karume international airport situated on the western part of the main town.

## A.2 Climate

The Zanzibar climate is warm and humid (equatorial). There are four seasons in a year i.e "Masika" experienced between March and May which is the main rainy season, *Kipupwe* in June to August which is the cold season, "Vuli" during the months of September to November which is a short rainy season and the hot season, "Kaskazi" is experienced from December to February. The average highest peak of rain in Unguja is in April while for Pemba the peak is in May as shown in Table A.2.1 below. The islands experience high humidity of between 70 and 80 percent.

## B. ADMINISTRATION AND POLITICS

The Revolutionary Government of Zanzibar was formed on 12<sup>th</sup> January 1964 under the first president Hon. Abeid Aman Karume. Two independent states, Zanzibar and Tanganyika, united on 26<sup>th</sup> April 1964 to form the United Republic of Tanzania. Since then Zanzibar has come to be part of the union but with its own elected President, Legislature as well as Judiciary System (except court of appeal).

The Revolutionary Government of Zanzibar is now on its seventh phase and it is governed by His Excellency, Dr Ali Mohamed Shein from 2010. This phase is operating through the Government of National Unity after the changes in the Zanzibar Constitution which allowed the opposition party to be included in the Government. Previous Presidents were;

The Late, Hon. Abeid Aman Karume	(1964 - 1972);
The Late, Hon. Aboud Jumbe Mwinyi	(1972 - 1984);
Hon. Ali Hassan Mwinyi	(1984 - 1985);
The Late, Hon. Idrisa Abdulwakil	(1985 - 1990);
Hon. Dr. Salmin Amour Juma	(1990 - 2000);
Hon. Dr. Aman Abeid Aman Karume	(2000 - 2010).

## C POPULATION AND DEMOGRAPHIC STATISTICS

Population, in its narrow sense reflect to totality of all observations of interest, in this case the number of humans in Zanzibar. In its wide sense, population reflects not only the size but also the composition, distribution, changes in its dynamics and in relation to development.

### C.1 Population Characteristics

The population of Zanzibar as of 2012 Tanzania Population and Housing Census (2012 TPHC) was 1,303,569 of which 51.6 were females. This marks a 2.8 percent annual increase compared with 2002 TPHC. The population Unguja was 896,721 and Pemba was 406,848. The population density increased from 400-person/sq. km in 2002 to 530 person/sq. km in 2012. The Current estimate of population June 2016 is 1,455 million with an estimated density of 548 person/sq.km.

The 2012 TPHC (Table C.1.4) confirm the predominance of large households, especially in three regions (Mjini Magharibi, Kaskazini Pemba and Kusini Pemba). The Zanzibar average household size was 5.1. However, the results show an uneven distribution in sex composition with a sex ratio of 94, meaning that for every 100 females there were 94 males.

The population projection is usefull in development planning, local administration, research, learning institutions and private business enterprises.

## D SOCIAL STATISTICS

Social Statistics comprise series of data from various sections including education statistics, health statistics, crime statistics and social welfare such as people with disability, orphans care and old people care.

### D.1 Education

After the Zanzibar Revolutionary Government announced Free Education for All (EFA) citizens of Zanzibar in 1964, new schools were initiated both in rural and urban areas. Every student has the right to get ten years free basic education and for those who are competent attain higher secondary, college and university education. Major changes in the curriculum, organization and administration of educational institutions have been introduced so that education for the students serves the needs of the country, encouraging self-reliance and adopt the development of science and technology.

The Key Result Area C of Zanzibar Strategy for Growth and Reduction of Poverty (ZSGRP – MKUZA III) emphasize the importance of inclusive and equitable access to quality education and skills training to enhance human capacity for sustaining human development.

Currently, Zanzibar is in the pathway through the transition to the new education system. All nursery schools have transitioned from offering three years of nursery education to two years, although few private schools are still operating the three years system. At the primary level, a new curriculum for six years cycle (Standard I to Standard VI) has been developed and practiced. In 2015 the first cohort that used the new curriculum completed Standard six, this is reflected in promotion rates in the year 2016 where there is a large intake of Form I students from those who completed both grades VI and VII. Under the new curriculum, English has been introduced as a medium of instruction from standard V for subjects of mathematics, ICT, geography and science.

#### a) Source of Data

Secondary data obtained from Ministry of Education and Vocational Training. Data are collected annually including the number of schools, students' enrolment by grade, performance in examination results and number of teachers.

The finding shows that, number of schools has increased at all levels, Public primary schools have increased from 119 in 2007 to 211 in 2016 and the number of private schools has increased from 27 in 2007 to 68 in 2016. The number of technical biased schools, teacher training college, science biased schools and higher learning institutions remained constant from 2007 to 2016.

The total number of students enrolled in STD I has increased by 24 percent from 36,608 pupils in 2015 to 45,394 pupils in 2016.

In 2016, the number of female students entered Form III has increased from 74.0 percent in 2015 to 75.2 percent in 2016 while no change was observed for male students.

## D.2 Health

The Revolutionary Government of Zanzibar has been providing free health services to all people of Zanzibar since 1964 with particular emphasis to women and children. This evolves from the government's understanding that national development and good health of the people cannot be separated. This is well stated under the Zanzibar Long term Development Plan "Vision 2020", the Zanzibar Strategy for Growth and Reduction of Poverty (ZSGRP - MKUZA III) as well as Sustainable Development Goals (SDGs). The Key Result Area C of MKUZA III emphasize improved access to quality health and sanitation services and safe clean water and mitigated burden of communicable (including HIV) and non communicable diseases.

The government's intention is to provide health services to the level of Primary Health Care, Secondary and Tertiary. These levels have been categorized under UNICEF for health facilities as Public Health Care Units (PHCU)/dispensaries; Public Health Care Centers (PHCC)/cottage hospitals and General Hospitals.

In Zanzibar, health facilities are classified into three levels of health care delivery:

1. Primary level: Primary Health Care Units and Centres (PHCUs and PHCCs)
2. Secondary levels: District and Regional Hospital
3. Tertiary levels: Mnazimoja Hospital (including two specialized Hospitals - Mwembeladu Maternity Home and Kidongo chekundu Mental Hospital)

### **Mode of data collection**

Data are produced by the Ministry of Health, Zanzibar through its Health Management Information System (HMIS) unit ,where by HMIS data collection process is based on daily routine which is in the paper format at level of Primary Health Care Units (PHCUs), Primary Health Care Centres (PHCCs), Private Dispensaries, NGOs and different hospital departments.

The information such as number of visiting out-patient and in-patient are collected both quarterly and annualy and others information are collected annually such as number of reported livebirth and death in public hospital and healtlh facilities and number of top ten reported diagnosis.

Primary Health care Units (PHCU and PHCU+) have increased from (107, PHCU and 26,PHCU+) in 2007 to (112 PHCU and 33, PHCU+) in 2016. The number of Medical practitioners (Medical Doctors) has increased from 84 in 2014 to 144 in 2016 while Psychiatric Nurses and Laboratory assistants have decreased from 163 and 25 in 2014 to 145 and 14 in 2016, respectively.

The number of visiting in-patients in public hospitals decreased from 72,373 in 2007 to 60,107 in 2016, this is due to the policy implementation of the Ministry of health urging the people to use their nearest health facilities instead of public hospitals. Similary the number of visiting out-patient decreased by 11 percent from 2015 to 2016.

Live births in public hospitals and PHCCs declined from 33,228 in 2015 to 29,789 in 2016. This is due to the fact that, some deliveries occur at primary health facilities (PHCU+) while number of reported deaths declined by 9 percent from 2015 to 2016.

The number of top ten reported diagnosis decreased from 2012 to 2016 in which Upper Tract Respiratory Tract Infections was highest reported over the past five years while intestinal worms was the least reported diagnosis.

The reported number of doses given to children under the age of one year increased from 2007-2016. The figure indicates that number of children who received Bacillus Calmette-Guerin (BCG) dose increased from 71,555 children in 2015 to 72,903 children in 2017.

### **D.3 Crime Statistics**

Crime statistics support planning and decision making in implementing effective and proactive strategies of fighting against crime. The information collected includes offences against persons and traffic accidents. The total number of inmates and criminal cases at juveniles such as file, decided and pending cases are also included. The number of offences are classified as minor and serious cases.

#### **Mode of Data collection**

The data are collected monthly and annually by using questionnaires which are sent to Prison department, police head quarter and high court department.

#### **Recorded Road Accidents**

In 2016, the total number of accidents recorded were 587 and the highest number of killed persons during the accidents were pedestrians (62) followed by cyclist (50). These two accounted for 57.4 percent of all persons killed in the accidents. Traffic offences has been increasing with at least 10 percent annual growth in the last five years, and marks an increase of 34.3 percent in 2016 compared with the previous year. Dangerous/carelessness in driving is sighted as one of the main drivers to these offenses.

#### **Crime Cases**

Data show that in 2016 more than two thirds (68.8 percent) of accidents were minor cases and 31.2 percent were serious cases. Mjini district shows the highest number of cases followed by Magharibi "B" district (2,184 and 2,117 respectively), while Micheweni and Mkoani districts have fewer cases compared with other districts (118 and 266 respectively). The number of serious cases have increased seven-fold between 2015 and 2016.

#### **Offences against Persons**

The results show that number of offences against persons increased to 2,181 in 2016 from 397 in 2015, this was highly attributed by assault (1,297) and rape to girls (371).

Community awareness was mentioned as one of the main reasons for increasing number of reported cases.

**Prison Statistics**

Generally, there were more male inmates than females across all age groups. On the other hand, the large number of the inmates were aged 18-30 years old, whereby majority of them (97.8 percent) are males.

**Court Cases**

The findings show that the number of juvenile criminal cases for all three categories have decreased between 2015 and 2016.

## E. LABOUR STATISTICS

Office of the Chief Government Statistician collects data on labour characteristics mainly from Formal Sector Employment and Earning Survey (FSEES) and the Integrated Labour Force Survey (ILFS). While FSEES is annual establishment based survey, usually undertaken in the month of June to all formal establishments for Government and parastatals as well as private establishments with employment size of five and above. The main objective of the FSEES is to provide information on employment and earnings which could be used for planning, policy formulation and decision making processes. The number of employees refers to month of June only, while cash earnings are covered for the whole financial year (July – June).

ILFS is household based undertaken after every five years. In order to take care of seasonality on employment data collection for ILFS runs for the whole year. This survey contains data for four major modules: Labour Force General, Informal Sector, Time Use and Child Labour.

### E.2 Employment and Earnings

Total employment has increased by 2.1 percent, from 53,193 in 2015 to 54,302 in 2016. All sectors (i.e. Government, Parastatals and Private) contributed to the change. The Government shares about three-fifths (59.0 percent) of the total formal employment while parastatals shares one in every ten employee (9.7 percent) of the total employment.

Composition by sex within institutions over the years suggests more males in employment. An exception is for the Government sector in 2016 is reported to have 4.2 percent more females compared to males.

Contrary to reported increase in employment, the wage bill in the year 2016 has declined by four percent compared to previous year. Striking effect that cash earnings (comprising of wages and salaries) contributed to more than 10 percent of this decline, although other benefits have increased substantially.

Great differentials are observed in wage bills. Parastatal, the least employer pays more than twice (TAS 11.2 million) the per-capita expenditure to employees compared with the Government sector (which pays an average annual expenditure of TAS 5.3 million). The private sector usually follows the average per capita expenditure in total employment.

### **Government**

The total number of Government sector employees in 2016 was 32,057 in which the number of female employees (16,357) was higher than the total number of male employees (15,700), while in 2015 the number of male employees (15,848) was higher than the total number of female employees (15,685). Generally, the number of employees was high for males compared with that of females for many industries in both years 2015 and 2016. The three industries of Public Administration, Education and Human health shares more than four-fifths (83.7 percent) of the employees. While employment in Government favours females (51.0 percent), about nine in every ten (88.5 percent) of these females are observed in these three industries.

On the other hand, the annual wage bill by industry in a Government sector in 2016 shows that, TZS 136,197 millions of total wage bill used for paying salaries and only TZS 2,924 million of wage bill was free ration. However, Education sector spent more (TZS 56,431 millions) wage bill for paying salaries compared with other industries.

### **Parastatal**

The total number of Parastatal employees in 2016 was 5,266 out of which 3,637 were male employees and 1,629 were female employees. Transportation and storage industries had the higher number of 1,671 employees compared with other industries.

However, the number of employees was higher for males compared with females for many industries in both years i.e. 2015 and 2016.

The results depict that a Parastatal sector consist of TZS 59,148 millions of total wage bill of which TZS 35,566 millions were from salary of employees, TZS 1,052 millions of free ration given in kind to employees and TZS 22,530 millions given as cash to employees as other benefits. Public administration and defence; compasory social security industry accounted for higher composition to total wage bill TZS 17,345 millions in 2016 while in 2015 Transportation and storage industries accounted for higher composition in total wage bill of 12,431 million.

### **Private**

In 2016, the total number of private employees was 16,979 of which 11,181 were males and 5,798 were females. Furthemore, Accomodation and food services activities had higher number of 9,109 employees compared with other industries. Generally, the number of employees is higher for males compared with females for many industries in both years i.e. 2015 and 2016.

Private wage bill for all industries accounts for TZS 103,486 millions of which, TZS 70,835 millions were used for salary to employees, TZS 11,164 millions were used as a free ration given to employees in-kind and TZS 21,486 millions were used for other benefits. Accomodation and food service activities industry have higher contribution to total wage bill (TZS 56,041 millions) compared with other industries while Real estate activities had lower contribution (TZS 18 millions) to total wage bill.

## F. MACRO ECONOMICS STATISTICS

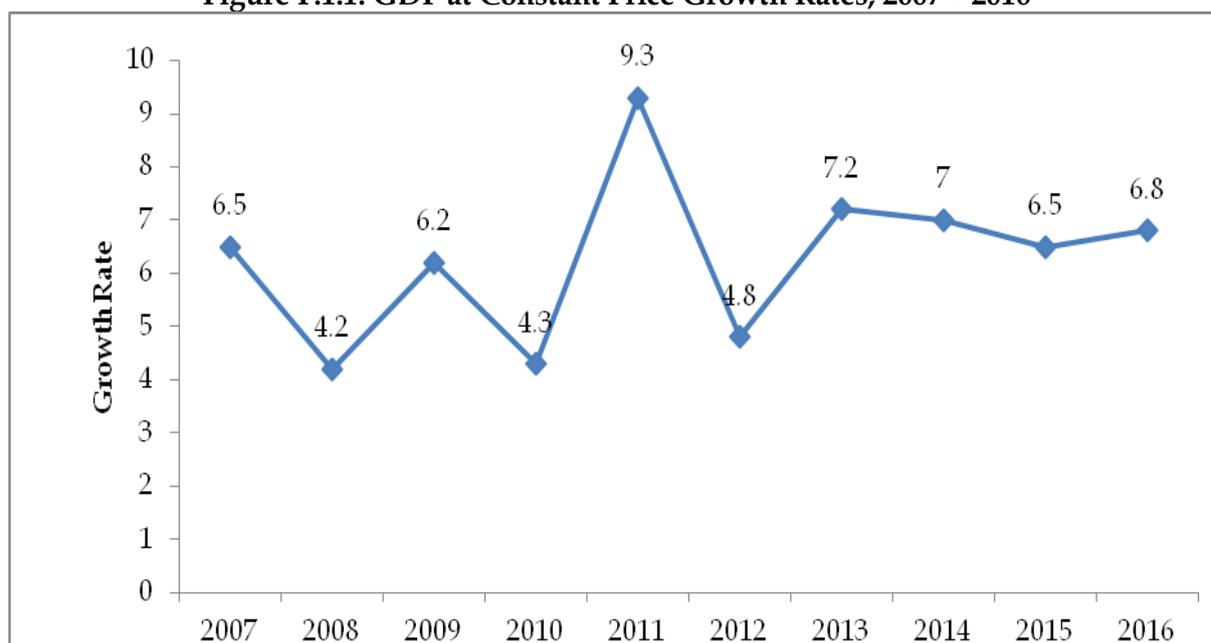

### F.1 National Accounts

The National Accounts of Zanzibar are compiled using a combination of production and income approaches. Although the data are subject to some limitations, the definition and concepts followed in the estimation are broadly in conformity with the UN recommendations contained in 1993 System of National Accounts (Series F. No. 2, Rev.3).

The 2016 GDP estimates incorporated a major revision that was made through rebasing process by changing the base year from 2001 to 2007. This revision led to changes in GDP at current prices from 2,310 billion in 2015 to 2,628 billion TZS in 2016. The constant GDP growth rate was 6.8 per cent in 2016 compared to 6.5 per cent in 2015. The growth rate of the major sectors namely Industry and Services grew up by 9.7 and 8.0 percent respectively while Agriculture, Fishing and Forest grew by 5.7 percent (Table F.1.5).

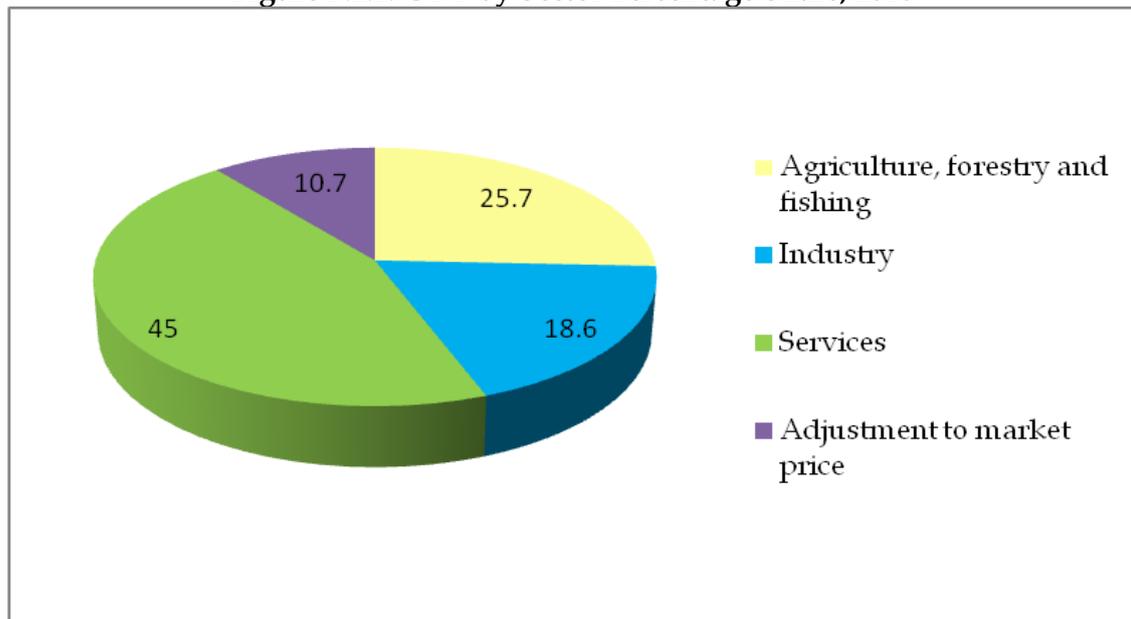

The per capita GDP went up from TZS 1,633,000 in the year 2015 to TZS 1,806,000 in the year 2016 equivalent to US Dollar 818 in 2015 to 830 in 2016. The details of National Accounts estimates are shown on Table F.1.1 to Table F.1.6 below.

## F.2 Government Finance Statistics

## **Introduction**

The Government Finance Statistics (GFS) is used to show the government expenditure by its functions (CoFoG) and economic activities of the government, including: government total revenue, government total expenditure, government balance (surplus/deficit), transactions in financial assets and liabilities, other changes in assets and liabilities and balance sheets.

## **Government Revenues and Expenditures**

The Revolutionary Government of Zanzibar recognizes domestic revenue of TZS 418.0 billions in 2015/16 compared with TZS 362.0 billions in 2014/15 which shows an increase of 15.49 percent of annual growth rate. Among the domestic revenue collected, 93.0 percent (TZS 389.9 billion) was collected from taxes while the remaining 7.0 percent, which is TZS 28.1 billion was from non-tax revenue. In 2015/16 the Government received external revenue of TZS 146.9 billions, out of this amount; loans received was amounting to TZS 70.3 billions and the remaining amount (TZS 76.7 billions) was received as a grant to finance development projects in Zanzibar.

The actual expenditures of Government of Zanzibar were TZS 474.13 billions in 2015/16 showing a decreasing rate of 0.83 percent compared with TZS 478.07 billions in 2014/15. Out of the amount spent in 2015/16, recurrent expenditure was TZS 395.94 billions and development expenditure was TZS 78.18 billions.

### F.3 Zanzibar Consumer Price Index (CPI)

Zanzibar Urban Consumer Price Index is a measure of the average change in prices paid by urban consumers for a fixed market basket of goods and services. It is not a cost of living index but a proxy indicator to it. Information is collected monthly at retail prices levels for selected items in each commodity group. The basket has been obtained from the 2009/10 Household Budget Survey and it uses the COICOP group specification, the basket has 269 items classified into twelve main groups.

The trend of the overall inflation rate in Zanzibar for the last four years remained in a single digit. The average annual inflation rate in 2016 was 6.6 percent compared to 5.7 percent reported in 2015; the average prices of goods and services in 2016 were higher compared with 2015. In 2015, the average annual food inflation rate was 7.4 percent and average non-food inflation rate was 4.0 percent while in 2016 annual food inflation rate was 8.4 percent and non - food inflation rate was 4.7 percent. The 2009/10 HBS adjusted non- institutional expenditure revealed that 51.6 percent of households' budgets were spent on food consumed at homes and restaurants. The main non - food items in the market basket were household's utilities (17.1 percent), clothing (9.3 percent) and transport (6.3 percent). The overall total household expenditure for non-food items is 48.4 percent in which education and health have 1.3 percent and 2.8 percent respectively.

## G. ECONOMIC PRODUCTION STATISTICS

### G.1 Agriculture

Agriculture industry plays an important role to the National economy, it's the source of food, employment generation and production of various raw materials. However, in the recent years food crops production in particular faces different challenges as a result of climatic change. Office of the Chief Government Statistician collects routine data of food and cash crops, livestock, fish catch, clove, etc. from the Ministry of Agriculture, Natural Resources, Livestock and Fisheries, Zanzibar State Trading Corporation (ZSTC), and other Government and private Agencies.

#### G.1.1 Crops

Data on production of crops show that the production of various food crops decreased due to unfavorable weather condition:

The production of paddy in 2016 recorded only 4,344 tones, which shows a decrease of 85.1 percent compared with 29,083 tones in 2015. Maize production decreased to 892 tons (68.4 percent) compared with 2,826 tons recorded in 2015, and that of Tania decreased to 1,724 tons (69.7 percent) compared with 5,687 tons recorded in 2015. However the production of pigeon peas increased to 1,414 tons (138.4 percent) compared with 593 tons recorded in 2015.

The planted area for various crops has also decreased. The planted area for yams decreased to 451 acres (69.7 percent) from 1,489 acres in 2015, followed by the maize which decreased to 1,783 acres (68.5 percent) from 5,652 acres recorded in 2015. The planted area for sorghum decreased to 458 acres (67.9 percent) compared with 1,426 acres in 2015 while the planted area for pigeon peas increased to 438 acres (138 percent) compared with 184 acres recorded in 2015. Despite the low production of paddy recorded in 2016, its planted area increased to 31,304 acres (25.4 percent) compared with 24,970 acres recorded in 2015.

Quantity of production for main cash crops shows that the production of clove stems has increased to 975 tones (more than four times) compared with 217 tones recorded in 2015 and that of cloves increased to 4,679 tones (40.8 percent) compared with 3,322 tones

in 2015. On the contrary, the production of seaweeds decreased to 11,114 tones (33.5 percent) compared with 16,724 tones recorded in 2015. For two consecutive years (2015 and 2016), there was no production of rubber recorded.

The quantity of cloves purchased in 2016 has reached 4,678.70 tones which is higher by 41 percent compared with 3,321.70 tones purchased in 2015. The highest purchase was observed in January whereby 2,061.2 tones were purchased while the lowest was recorded in May with only 26.8 tones.

### **G.1.2 Forestry**

Forest resources are managed by the Department of Forestry and Non Renewable Resources. This department deals with management of forests plantations, mangrove forests and natural forests found in Zanzibar. The natural forest consists of mosaic of vegetations ranging from short coral bushes and thickets to higher closed forests. Forests are also the home of different species of medicinal significance while others are available for various uses. Forests are also a source of foreign exchange through ecotourism. The most common forests visited by tourists are Jozani National Park and Ngezi forest reserves. Besides the tangible and intangible economic benefits of the forest sector, the data presented in this section reflect information on forest products that are only harvested from different forest areas in public land and government plantations; while the Department of forest authorizes special transport permits to reserve royalty.

The production of beam increased from 2,325 cubic meters in 2015 to 2,457 cubic meters in 2016 (5.7 percent). The production of firewood also increased to 19,532 cubic meters compared with 18,573 cubic meters (5.2 percent) recorded in 2016, furthermore the increase of charcoal production was also observed whereas 2,046 tons of charcoal were produced compared with 2,005 tons produced in 2015, this marks an increase of two percent. On the contrary the production of withes decrease to 2,830 cubic meters compared with 3,232 cubic meters recorded in 2015.

### **G.1.3 Fisheries**

Fish constitutes the most important source of protein in Zanzibar. Fisheries development covers the area of coastal zone or specifically marine resources. The potential fishing zone within Unguja and Pemba Islands lies within 50-fathom contour around the two islands, and covers an estimated total area of 4,450 km<sup>2</sup>.

The estimated fish catch show that the quantity of fish caught slightly decreased to 33,892.6 tones (0.6 percent) compared with 34,103.8 tones recorded in 2015. For the year 2016, the highest quantity of fish catch was observed in September where as 3,218.2 tons of fish was caught.

## **G.2 Industry**

Zanzibar industrial activities are centered mainly on small and medium scale processing of domestic goods; food processing, beverages and processing of agricultural products. Industrial sector includes all establishments engaged in activities that fall under mining (for Zanzibar this is mainly quarrying), manufacturing, generation and distribution of electricity, gas and water. This is as recommended in International Recommendations on Industrial Statistics.

### **G.2.1 Selected commodities**

The results show that, the production of the selected commodities has increased by 57.4 percent in 2016 compared with 21.5 percent in 2015. This was due to an increase in demand of the product in the domestic market. Production of wheat flour decreased from 27,749 tones in 2015 to 23,834 tones in 2016 which is equivalent to 14.1 percent mainly due to the increase in the competitive market. Noodles production decreased from 277,990 kgs in 2015 to 181,872 kgs in 2016 (34.6 percent), this was due to its low demand and it is a seasonal product.

Production of garments (Dash Dash) has increased from 3,419 pcs in 2015 to 3,674 pcs in 2016 equivalent to 7.5 percent, this was largely attributed to an increase in demand.

The production in public industries (clove stem oil, printing services and electricity distribution) has increased from TZS 59,122,567 thousands in 2015 to TZS 87,957,637 thousands in 2016 (48.8 percent). Private industries (beverages, wheat flour, diary product and garments) in 2016 has the higher value of production (TZS 97,761,779 thousands) than public industries.

## H. ECONOMIC SERVICES STATISTICS

### H.1 External and Inter - State Trade

Trade statistics gives brief explanation of flows/directions of trade balances and volumes, specializations (comparative advantage) and their economic influence. Statistics on imports and exports form a valuable component of a country's statement of economic transactions in the National Accounts and Balance of Payments. Accordingly, international comparable Trade Statistics that are accurate, detailed and timeliness have always been a statistical priority. Such information is vitally important for the planning and future development of Zanzibar.

External trade statistics are compiled from documents provided by exporters and importers to the Tanzania Revenue Authority. Considerable reliance is placed on the exporters/importers and their agents submitting correct codes and information. Before the data is released for statistical purposes it is validated and detected errors corrected however no warranty can be given that this information contains no errors. It should also be noted that goods crossing international borders without appropriate Customs documentation would not be included in external trade.

Import statistics are available by "Country of Origin" - the country of manufacture of the goods as shown on the import declaration forms. The value of imports includes 'Importation for direct home use (duty and tax fully paid)', 'Importation by, or solely for use by the government of Tanzania Zanzibar' and other importation procedure (Excludes all transfer goods). Imports are valued at Cost Insurance and Freight (CIF) at the port entry.

Exports statistics includes domestic export and re-export. Domestic export refers to exports of goods of national origin while re-export refers to goods exported in the same condition as imported or after undergoing minor operations which leave them essentially unchanged. Domestic exports and re-exports are valued Free on Board (FOB).

Trade balance is the difference in the value of exports and imports. Zanzibar has never experience a positive balance of trade; this means that Zanzibar imports more than exports.

Inter-State trade statistics provides an idea about the demand of commodities produced or consumed in Zanzibar along with flows thereof to the other side of country that is Tanzania Mainland). Different goods transferred include foods and non-foods items, such as building hardware, transport hardware and other imported materials from mainland.

In 2016, Zanzibar recorded a total trade value of TZS 26,322.90 millions which indicates a decrease of 32.1 percent compared with TZS 199,348.1 millions recorded in 2015.

The recorded export values in 2016 was TZS 96,234.9 millions which is doubled compared with TZS 42,407.0 million recorded in 2015. Vegetable products contributed TZS 69,077.1 millions equivalent to 71.8 percent of the total export value. The exported value of Cloves recorded in 2016 was TZS 64,723 which is equivalent to 67.3 percent of the total value. For the last four years, India appeared to be the major buyer of the exported commodities from Zanzibar, especially cloves. The ten years trend (2007-2016) of the export data shows that, the value of export is non-directional, but it attained its highest position (TZS 133,591.7 millions) in 2014 while the least value was (TZS 17,906.7 millions) observed in 2010.

The value of the imports in 2016 was TZS 16,088.0 millions which indicates an increase of 6.5 percent compared with 156,941.1 recorded in 2015. Machinery & Mechanical Appliances, Electrical product recorded the highest value of TZS 39,58.6 of the total import. As for the exportation, the trend of the imported values is non-directional. The highest value of import (TZS2 79,552.8 millions) is observed in 2014 while the lowest was TZS 93,439.6 millions in 2008.

The trade balance in 2016 has shown a deficit of TZS 70,853.1 millions compared with the deficit of TZS 114,534.1 millions recorded in 2015

**Table H.1.1: Imports, Exports and Trade Balance, 2007 - 2016 (TZS Millions)**

Year	Import	Export	Trade Balance
2007	107,689.9	21,177.7	(86,512.8)
2008	93,439.6	30,189.2	(63,250.4)

## H.2 Tourism

Tourism as an activity and industry has grown in Zanzibar tremendously; this is due to the natural habitation of the Islands as a tourist destination, based on the historical and natural attractions. Zanzibar has potential resources to attract tourists. These are Zanzibar Stone Town and Marine environment, which is a primary attraction to tourism. These attractions which are the Zanzibar's point of entry for tourists, characterized by old design building which makes beautiful narrow streets, coral reefs, sand beaches, water area used for traditional fishing and diving etc.

Findings show that October recorded the highest number of visitors (44,169), followed by December (43,863) while May had the least number of visitors (13,654). For the year 2016, the number of visitors increased to 376,242 compared with 294,243 visitors recorded in 2015, equivalent to 27.9 percent increase. Improvement of tourism services, easy accessibility of flights to Zanzibar and increase the marketing of Zanzibar tourism through website are considered as factors behind the increase of the number of tourists. In country wise, Italy take the first position which accounts for 12.4 percent of all visitors, followed by German (10.6 percent) and Britain (8.4 percent).

Data further show that 235,168 visitors (80.8 percent) visited Zanzibar through Airport, of whom 168,136 came by international flights and 67,032 by domestic

flights from various regions of Tanzania Mainland. The remaining visitors 122,164 (19.2 percent) entered through Seaport whereby 59,075 were day visitors (excursionist) and 63,089 visitors came by ferry boat from Tanzania Mainland.

Composition by sex suggest more females visited Zanzibar than males. There were 212,414 (56.5 percent) females and 163,828 (43.5 percent) males who entered Zanzibar in 2016. Majority of visitors (98.1 percent) came to Zanzibar for leisure/holidays.

Furthermore, data reveal that Israel recorded the highest proportion (37 percent ) of the visitors from the emerging countries, followed by India (21 percent) while Russia recorded the least (1.1 percent). Generally, the number of visitors from emerging market in 2016 shows a remarkable increase of more than hundred percent compared with 2015. The number of visitors from all emerging countries increased compared with 2015.

Generally, data show that the number of visitors has been increasing from 2007 to 2009, however they fluctuated from 2009 to 2013. Remarkable increase in 2014, partly reflects the increase coverage in data collection. The highest peak is observed in 2016.

### **H.3 Utility, Energy and Fuel**

This section presents statistics on water, electricity and imports of fuels products that government intervention has been largely focused on. The section provides data on water supply, electricity distributed and imports of fuel products. These statistics are collected through the three main sources; namely Zanzibar Water Authority (ZAWA), Zanzibar Electricity Corporation (ZECO) and Tanzania Revenue Authority (TRA) Zanzibar.

Data in water supply are collected on routine basis and only in annual, while electricity distribution are collected on quarterly and annual as well. The information such as boreholes drilled water production, revenue collection and other statistics are collected on annual basis through ZAWA. The information such as quantity of distributed value of electricity distributed and number of new customers connected to National Power Grid (NPG) are collected through ZECO. Data on the imports of fuel products are collected through TRA on quarterly basis.

#### **H.3.1 Water Supply**

According to Water Act No. 4 of 2006, the Zanzibar Government has to provide safe and clean drinking water to all the people and provide enough water for industries, institutions and irrigation farming. In rural areas, the Zanzibar Water Authority is responsible for providing villages with piped water from ground water sources such as wells, caves and boreholes. Development of rural and urban water connections is undertaken by Government as well as support from donor countries and other Agencies in terms of loans and grants.

The Water Act defines the roles of different stakeholders in the development, management and use of water resources countrywide. The Act has the aim of providing guidance to enable Revolutionary Government of Zanzibar to achieve its goal of providing access to clean and safe water for her people and other water users to fulfill the needs of expanding social and economic activities while considering the nature of conservation.

The amount of water supplied in 2016 was 43,851,743.3 cubic meters whereas the estimated demand was 56,314,180.8 cubic meters, this indicate a total deficit of 22.1 percent in demand. The highest water supply by region was recorded in Mjini Magharibi Region where 24,950,140.0 cubic meters were supplied followed by Kusini Unguja Region with 6,421,880.0 cubic meters. The region with the lowest water supply was Kaskazini Pemba whereby there were only 2,485,513.7 cubic meters supplied.

The total revenue collected for water supply in 2016 was TZS 2,602,154,289.4 with the highest revenue collected from Mjini Magharibi Region amounting TZS 1,857,411,816.8 (71.4 percent) followed by Kusini Pemba with total revenue of TZS 427,769,017.6 (16.4 percent). The Region with the lowest revenue collected was Kaskazini Unguja with the total amount of TZS 24,105,800.0 (0.9 percent).

The number of Boreholes drilled in 2016 decreased by 55.4 percent from 74 boreholes in 2015 to 33 boreholes in 2016 this was due to the highly increased boreholes in previous year.

**Table H.3.1.1: Water Supply and Revenue Collection by Region, 2016**

Region	Total Water Production (Cubic Metre)	Estimated Water Demand (Cubic Metre)	Deficit in Demand (Percent)	Revenue Collection (TZS)
Kaskazini Unguja	6,516,560.0	8,098,056.0	(19.5)	24,105,800.0
Kusini Unguja	6,421,880.0	4,993,401.6	(28.6)	37,551,400.0
Mjini Magharibi	24,950,140.0	25,646,889.6	(2.7)	1,857,411,816.8
Kaskazini Pemba	2,485,513.7	9,146,822.4	(72.8)	255,316,255.0

### H.3.2 Electricity

The recorded number of new customers connected to National Power Grid in 2016 is 12,768, which is slightly higher (3.3 percent) compared with 12,366 in 2015.

The quantity of electricity sold to different customers increased by 9.7 percent from 297,816 thousand KWH in 2015 to 326,606 thousand KWH in 2016, and the value of electricity distributed increased by 47.8 percent i.e. from TZS 58,630,177 thousands to TZS 86,626,356 thousand.

## H.4 Transport and Communications

This section presents statistics on transport and communication. Transport statistics comprise of data on road network, movements/trips (enter/exit), traffic handling of passengers and cargo – both at airports and seaports as well as information on number of motor vehicles registration and licenses issued to both public and private automobiles. Communication data comprise of number of registered radio and television, internet subscribers and internet users.

### H.4.1 Transport

The transport sector plays a big socio-economic role in the movements of people and distribution of goods and services. The transport system in Zanzibar is divided into:

- a. Interregional transport between Islands, Mainland and the coastal area of Eastern Africa.
- b. Local internal transport within each island.
- c. The rest of the world

The modes of transport comprises of sea, air and road transport. Interregional transport is handled by sea and air while local transport is dominated by road traffic and ferry boats. The Coastal Travel, Precision Air, Zan Air, Fast Jet, Tropical Air, Air Tanzania, Assalam , Auric Air, Flight Link etc. airlines serve flights in and out of Zanzibar.

Shipping statistics relate to steam and sailing ships engaged in international or coastwise trade arriving either with cargo, passengers or in ballast. The cargo handled is shown in dead weight tones (d.w.t).

Number of passengers at Unguja and Pemba seaports increased from 2,289 thousands in 2015 to 2,461 thousands in 2016 (7.5 percent). Number of foreign going vessel decreased to 120 in 2016 from 142 in 2015 (15.5 percent) and number of trips enter/exit decreased to 7,227 in 2016 from 7,812 in 2015 (7.5 percent).

## H.4.2 Communication Statistics

Communication statistics comprise services of radio and television, telephone, internet subscriptions as well internet users. Communication facilities are vital parts of a nation's infrastructure. The commercial, political, social, cultural and industrial development of any nation depends largely on the efficiency of its communication systems. This is because the proximity of any two given communities is realistically not as much a function of physical distance as of accessibility via various means of communications. These facilitate intra-community relationships at various levels in the country and also enhance the fundamental basis for relationships between the country and the rest of the world.

In 2016, the number of national Television stations increased to 13 from 12 recorded in 2015, the number of Telephone subscribers increases from 1,289,698 in 2015 to 1,167,296 in 2016. Internet Users increased from 477,562 in 2015 to 556,477 in 2016.

Percentage of children aged 0-4 with birth certificate	95.4	94.7	96.0	99.5	99.4	98.6	98.8	97.4	97.1	98.9	97.7
Percentage of children aged 0-17 with birth certificate	93	94.2	96.4	99.3	99.4	98.2	97.6	94.8	96.1	95.9	97
Percentage of households owning their accommodation	92.8	82.9	93.8	86.2	81.5	69.2	84.3	90.8	83.2	90.5	83.7
Percentage of households with modern floors	72.7	65.1	71.3	74.5	94.7	97.5	64	42	67.8	59.7	77.9
Percentage of households with modern walls	87.3	77.4	81.2	95.2	96.8	99	45.1	40.6	46.8	29.5	77.1
Percentage of households with a modern roof	86.1	72.9	75.2	83.8	97.1	99.2	72.8	47.9	86.4	83.5	85.4
Average number of persons per room for sleeping	2.2	2.4	2.3	2.1	2.2	2.1	2.3	2.5	2.5	2.2	2.2
<b>Education</b>											
Percentage of adults (aged 15+) with no education	27.8	18.3	11.6	8.1	7.2	6.7	28.8	39.5	18.8	23.8	16.1
Percentage of literate adults aged 15+	71.9	82	85.5	91.3	92.5	93.9	71.1	60.3	80.9	75.9	83.7
Percentage of literate female adults aged 15+	65.5	76.5	81.9	87.9	89.6	91.9	64.7	52.7	76.6	68.1	79.4
Basic Net Enrolment Rate	78.6	83.1	86.1	94.6	87.4	88.3	80.6	68.4	82.1	79.2	83.8
Primary School Net Enrolment Rate	77.4	82.6	88.7	94.5	88.1	89	81.9	66.7	83.5	78.8	84.2
Secondary School Net Enrolment Rate	35.2	34.1	37.1	40.8	44	46.7	37.4	31.1	36.8	39.2	40.1
Percentage of households within 2 km of a primary school	99.3	98.2	97.5	99.1	97.7	97.6	97.1	90.2	97.9	88.5	96.5
Mean Amount of Time Spent Travelling to Primary School	14.4	15.7	21.4	13.4	20.1	16.2	18.5	22.9	19.7	22.6	19.1
Mean Amount of Time Spent Travelling to Secondary School	11.7	18	20.9	14.4	21.8	18.7	16.3	23.2	16.3	21.9	19.4
Percentage Distribution of Household Head Highest Level of Education Achieved (no education)	39.4	27.4	17.8	12.6	9.5	9.3	37	56.1	28.5	36	23.3
<b>Health</b>											

Zanzibar Statistical Abstract, 2016

Indicator	2014/15										
	Kaskazini "A"	Kaskazini "B"	Kati	Kusini	Magharibi	Mjini	Wete	Micheweni	Chake Chake	Mkoani	Total
Percentage of respondents who were ill in the last 4 weeks	15.7	12.2	10.7	14.1	8.4	8.6	13.1	15.2	14.1	12.3	11.3
Percentage of ill individuals who consulted any health care provider in last 4 weeks	28.1	42.4	26.6	17.6	33.1	54.4	29.1	7.3	18	14.5	73.9
Didn't use health care provider as too expensive	5.1	2.9	3.1	8.8	10.9	18.8	5.0	5.0	12.9	7.7	8.6
Percentage of households within 5 km of a primary health care facility	100	100	100	100	100	100	100	100	100	100	100
<b>Water and Sanitation</b>											
Proportion of households using protected water source for drinking in dry season	83.4	92.9	88.5	98.6	94.5	97.8	89.0	70.1	86.5	92.6	90.5
Percentage of households within 1 km of drinking water in dry season	90.7	96.3	95.5	94.5	99	99	92.5	98.2	97.4	98.4	96.9
Percentage of households with any toilet facility	82	80.8	93	92	99.1	99.9	62.1	38.1	71.4	65.8	83.7
Mean Average Number of Trips Made a Day to Collect Water during dry season	1.6	1.6	2	1.7	1.8	1.5	2.3	2.3	2.7	2.1	2
<b>Household Consumption (New Methodology 09/10 &amp; 14/15)</b>											
Average consumption per capita (Tshs.28 days)	83,660	75,387	69,283	62,099	87,492	92,952	55,382	43,311	62,906	57,593	74,707
Mean per adult equivalent consumption expenditure	88,563	81,321	76,240	68,518	93,690	99,644	65,525	49,789	62,664	60,692	80,497
<b>Poverty and Inequality (New Methodology 09/10 &amp; 14/15)</b>											
Percentage of population below the basic needs poverty line	20	23.3	25.1	26.3	19.2	14.6	47.7	69	51.6	52.4	30.4
Percentage of population below the food poverty line	4.4	7	7.2	6	3.5	5	15.7	32.6	24.4	21	10.8
Gini Coefficient	28.5	27.8	25.3	19.4	26.8	33.3	27.2	22.3	28.9	27	30.2
Percentage Distribution of children(0-17) below basic needs Poverty line	23.5	25.5	29.7	26.7	16.1	21.7	51.6	72.1	56.4	57.2	34.7
Percentage Distribution of children(0-17) below food Poverty line	5.4	8.3	8.3	5.5	3.6	5.3	18	35.2	28.1	24	12.8
<b>Energy Sources</b>											
Percentage of households connection to electricity grid	17.5	18.3	25.6	31.3	66.4	86.8	26.3	7.5	41.8	15.4	44.2

Zanzibar Statistical Abstract, 2016

Indicator	2014/15										
	Kaskazini "A"	Kaskazini "B"	Kati	Kusini	Magharibi	Mjini	Wete	Micheweni	Chake Chake	Mkoani	Total
<b>(ZECO)</b>											
Percentage of households using electricity for lighting	19.5	19.2	29.7	34.9	66.8	87	26.6	9	42.6	18	45.4
Percentage using paraffin lamps for lighting	77.3	76	60.2	45.2	26.8	9.9	68.1	89.2	55.2	76.5	49.2
Percentage of households using charcoal or firewood for cooking	99	96.9	96.2	98.4	92.8	85	94.4	98.6	97.6	98	94.2
<b>Economic Activity</b>											
Percentage of Unemployed Persons Aged 15 Years and Above	7.4	8.2	7.2	2.8	8.3	13.2	6.8	2.6	5.1	3.7	7.7
<b>Agricultural Activities</b>											
Percentage of Households Owning/Not Owning Land for Agriculture or Grazing	52.5	32.1	54.6	46.9	10.3	5.7	57.5	75.1	58.5	68.2	35.8
Percentage of Households Using Land for Agriculture or Grazing	62.4	41.4	56	47.2	9.9	5.5	58.6	72.6	65.3	74.6	38.2
<b>Trips for business and recreation</b>											
Percentage of Households who had Taken At Least One Overnight Trip in the Last 12 Months	52.6	47.1	39.7	65.5	33	37.7	27.1	26.7	43.6	31	37.7
Percentage of Households by Mean Number of Nights Spent on the Trip	7.8	5.4	11.7	4.3	16	12.2	38.2	28.9	23.5	29.3	15.8
<b>Food Security</b>											
Mean Average Household Food Insecurity Access (HFIA) Scale Score	7	7.9	5.6	3.1	2	2.1	4	6.1	5.7	4.7	4.1

## **Annex: List of Contributors to the Zanzibar Statistical Abstract, 2016**

### **Management “Head – Monitoring Supervisors”**

Mayasa M. Mwinyi	Chief Government Statistician
Haroub A. Masoud	Office in Charge of OCGS Pemba
Abdul rauf R. Abeid	Director, Department of Economic Statistics
Abdulla M. Denge	Director, Department of Finance, Planning and Administration.
Ali I. Shamte	Acting Director, Department of Statistical and Technical Support Services
Khadija Kh. Hamad	Acting Director, Department of Demographic and Social Statistics

### **Task Force Team**

Mwalim J. Mohamed	Chairperson
Hashim U. Mohamed	Manager of Dissemination and Publication
Habiba S. Salim	Secretary
Abdul-malik Bakar	Member
Aisha A. Haji	Member
Asha M. Mahfoudh	Member
Amina M. Denge	Member
Ramla O. Said	Member

### **Editorial Board**

Mrs. Mayasa M Mwinyi	Chairperson
Mrs. Mashavu Kh. Omar	Member
Mr. Mbwana O. Mbwana	Member
Mr. Idrissa A. Shamte	Member
Mr. Maulid S. Kombo	Member
Mr. Bakar Kh. Kondo	Member
Mrs. Nour A. Masoud	Member
Mrs. Mwanangaza M. Hafidh	Secretary

## **Office of the Chief Government Statistician , Zanzibar**

### **Vission**

**The Vission of the Office of Chief G overnment Statistician (OCGS) is “To become a Centre of excellence for statistical production and for promoting a culture of Evidence - based policy and decision- making”.**

### **Mission**
